

ABDULLAH GULZAIB

Front-End Developer

03249331337 | abdullahgulzaib69@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Second-year Bachelor of Science in Computer Science student specializing in front-end web development. Passionate about building responsive, interactive user interfaces with React.js, JavaScript, HTML, and CSS, backed by a strong foundation in object-oriented programming (Java, C++) and version control (Git/GitHub).

TECHNICAL SKILLS

Front-End: React.js, JavaScript, HTML, CSS

Other Languages: Java, C++, C

Tools & Workflows: Git, GitHub, Terminal Environments

Other: AI Generation Tools (Prompt Engineering, Image Composition for UI assets)

PROJECTS

Portfolio Website | *JavaScript, HTML, CSS* | [GitHub Repo](#)

- Designed and developed a personal portfolio site to showcase profile information and project work in a structured, navigable layout.
- Built the UI with modular HTML/CSS components and JavaScript for interactivity, focusing on responsive layout across screen sizes.

Weather App | *React.js, JavaScript, CSS* | [GitHub Repo](#)

- Built a React-based weather application demonstrating component-driven UI design and client-side state management.
- Implemented reusable components to display weather data with a clean, responsive layout suited to different screen sizes.

Java Design Patterns & DSA Practice | *Java* | [GitHub Repo](#)

- Built a dedicated Java repository implementing a progression of coding patterns, from basic loop-based patterns to advanced logic-building exercises.
- Used the project to strengthen core data structures and algorithms fundamentals, including nested loop logic, recursion, and pattern-based problem solving.

Blog App | *HTML, CSS* | [GitHub Repo](#)

- Developed a blog-style front-end layout focused on clean typography and readable content presentation.
- Applied CSS layout techniques to structure post content, headers, and navigation in a consistent, responsive design.

EXPERIENCE

Front-End Developer | *Self-Directed & Collaborative Learning*

- Collaborated with a peer developer to learn and implement responsive, interactive user interfaces, building hands-on experience with modern front-end workflows.
- Actively developing front-end skills for close to two years through self-directed projects and collaborative learning.
- Utilized front-end technologies (React.js, HTML, CSS, JavaScript) to build and optimize web components for consistent performance across devices and browsers.

Java GUI Developer | *Academic Project*

- Upgraded a console-based object-oriented system into a fully functional Graphical User Interface (GUI) application.
- Leveraged the Java Swing framework in IntelliJ IDEA to improve usability and interaction design.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Air University, Islamabad | Expected Graduation: 2029

INTERESTS & FUTURE VISION

- Future Tech Goals:** Passionate about expanding technical expertise beyond front-end development, with plans to pursue specialized training in Cybersecurity and Backend technologies (Node.js, Express.js, databases).
- Creative Media:** Strong interest in digital content creation, particularly editing high-energy, cinematic sports and cricket videos for social media platforms.
